

Trinity Customized Logistics

Our Customized Logistics Division specializes in creating a consultative relationship to understand the inner workings of your business. With over 30 years of experience, Trinity is a leader in providing logistics solutions that enhance your customer service, visibility of freight, and shipping processes.

Your TCL team will create “steps to success” to reduce your logistics time commitment and budgetary expenses. We quickly identify inefficiencies and smoothly implement plans to improve your supply chain process. End result? You’ll experience happier customers and reduced expenses!

TCL’s Steps to Success:

1. Review current transportation processes
2. Identify process gaps compared to industry best practices
3. Implement a web-based Transportation Management System (TMS)
4. Automate time consuming manual processes
5. Capture current market rates and establish core carrier base
6. Create minimum carrier performance standards
7. Optimize shipments for most efficient route plan
8. Develop detailed analytical reports
9. Provide visibility to key personnel
10. Formulate strategic improvements based on accurate data

For more information, contact your local representative, or visit our website, www.TrinityCustomized.com. Complementary freight consultations and software demonstrations are available at your convenience.

Freight solutions designed with your needs in mind

Exclusive Offer to TCL Clients:

We combine our experienced staff with a web-based Transportation Management System (TMS) solution to analyze, consolidate, and optimize your shipments and transportation information.

Our team will help you make improved freight decisions based on your specific goals, business requirements, and time constraints.

**Freight visibility and reporting
at your fingertips**
